

Kumarkhaniya Aditya

PYTHON BACKEND DEVELOPER

Ahmedabad, Gujarat · +91 83026 13931 · kumarkhaniyaaditya123@gmail.com · GitHub: aditya-121105 · LinkedIn: kumarkhaniya-aditya

Final-year Computer Engineering student specializing in backend development with Python, FastAPI, and PostgreSQL. Experienced in building REST APIs, database design, and secure authentication systems.

EDUCATION

B.Tech Computer Engineering (AI/ML)	CGPA 9.23/10
Silver Oak College of Engineering and Technology	Pursuing (2023–2027)
Class XII (CBSE)	70%
Science — PCM + Computer Science	
Class X (GSEB)	86%

TECHNICAL SKILLS

Programming	Python, SQL, C, C++, Java
Python Libraries	NumPy, Pandas, Matplotlib, Scikit-learn
AI / Machine Learning	TensorFlow, PyTorch, NLP, spaCy, Sentence Transformers
Backend	FastAPI, Flask, REST APIs, SQLAlchemy, Alembic, Pydantic, JWT Authentication
Databases	PostgreSQL, MySQL, SQLite
Developer Tools	Git, GitHub, PyCharm, Jupyter Notebook
Cloud & DevOps	Docker, Docker Compose, AWS EC2, AWS ECS, AWS ECR, AWS IAM, AWS S3, GitHub Actions, Linux, Nginx, CI/CD

PROJECTS

SpeakLift	<i>Python · FastAPI · PostgreSQL · SQLAlchemy · Alembic · JWT · spaCy</i>
Architected scalable FastAPI backend using repository pattern, service layer architecture, and dependency injection to ensure clean separation of concerns and maintainable codebase structure.	
Designed and implemented RESTful APIs for interview question management with comprehensive CRUD operations, JWT-based authentication with bcrypt password hashing, and role-based access control.	
Built PostgreSQL database schema with SQLAlchemy ORM, implemented Alembic migrations for version control, and integrated spaCy NLP pipeline for automated question generation with configurable parameters and error handling.	
ResumeGuide	<i>Python · FastAPI · PostgreSQL · SQLAlchemy · Docker · AWS · GitHub Actions</i>
Developed resume analysis platform backend with FastAPI and PostgreSQL, implementing secure user authentication using JWT tokens and Google OAuth integration with role-based access control.	
Designed relational database schema using SQLAlchemy ORM with normalized tables for users, resumes, and analysis results, ensuring data integrity through foreign key relationships and constraints.	
Containerized application using Docker and deployed on AWS ECS with automated CI/CD pipeline through GitHub Actions for testing and production deployment.	
Tuition Management System	<i>Python · Flask · SQLAlchemy · SQLite · Docker</i>
Built Flask backend application with SQLAlchemy ORM to manage student attendance, marks tracking, fee collection, and timetable scheduling with role-based access for administrators and teachers.	
Implemented business logic for automated fee calculations, attendance percentage tracking, and performance analytics with server-side validation and error handling.	
Developed PDF receipt generation module and CSV export functionality for reporting, and containerized the application with Docker for consistent deployment environments.	

EXPERIENCE

Cloud Technology Intern — AxisRay	June 2025 · 15 Days
Completed hands-on assignments covering cloud infrastructure fundamentals, application deployment architectures, and software development workflows on cloud platforms.	
Explored cloud service models (IaaS, PaaS, SaaS), containerization concepts, and automated deployment pipelines for scalable web applications.	
MLOps Technology Intern — AxisRay	May 2026 · 15 Days
Completed assignments on machine learning deployment workflows including model containerization, API development for model serving, and CI/CD integration for automated deployments.	
Studied MLOps lifecycle covering model training, versioning, deployment strategies, monitoring approaches, and automated retraining pipelines for production systems.	

CERTIFICATIONS
