

Kumarkhaniya Aditya

PYTHON DEVELOPER | DATA ANALYTICS

Ahmedabad, Gujarat · +91 83026 13931 · kumarkhaniyaaditya123@gmail.com · GitHub: aditya-121105 · LinkedIn: kumarkhaniya-aditya

Final-year Computer Engineering student with strong foundation in Python programming, SQL, and backend development. Experienced in building REST APIs with FastAPI, PostgreSQL database design, and data processing workflows with exposure to cloud deployment.

EDUCATION

B.Tech Computer Engineering (AI/ML) Silver Oak College of Engineering and Technology	CGPA 9.23/10 Pursuing (2023–2027)
Class XII (CBSE) Science — PCM + Computer Science	70%
Class X (GSEB)	86%

TECHNICAL SKILLS

Programming	Python, SQL, C, C++, Java
Python Libraries	NumPy, Pandas, Matplotlib, Scikit-learn
AI / Machine Learning	TensorFlow, PyTorch, NLP, spaCy, Sentence Transformers
Databases	PostgreSQL, MySQL, SQLite
Backend	FastAPI, Flask, REST APIs, SQLAlchemy, Alembic, Pydantic, JWT Authentication
Developer Tools	Git, GitHub, PyCharm, Jupyter Notebook
Cloud & DevOps	Docker, Docker Compose, AWS EC2, AWS ECS, AWS ECR, AWS IAM, AWS S3, GitHub Actions, Linux, Nginx, CI/CD

PROJECTS

SpeakLift Built scalable backend application using Python and FastAPI with repository pattern and service layer architecture, implementing dependency injection for clean code structure and maintainability. Designed RESTful APIs for interview question management system with full CRUD operations, JWT-based authentication using bcrypt password hashing, and role-based access control. Developed PostgreSQL database schema with SQLAlchemy ORM and Alembic migrations, integrated spaCy NLP library for automated question generation with structured data processing and error handling.	<i>Python · FastAPI · PostgreSQL · SQLAlchemy · Alembic · JWT · spaCy</i>
--	---

ResumeGuide Developed Python-based resume analysis platform using FastAPI framework and PostgreSQL database, implementing secure user authentication with JWT tokens and Google OAuth integration. Designed normalized database schema with SQLAlchemy ORM for managing user data, resume storage, and analysis results with proper foreign key relationships and data integrity constraints. Containerized application with Docker and deployed on AWS cloud infrastructure with automated CI/CD pipeline for continuous integration and deployment.	<i>Python · FastAPI · PostgreSQL · SQLAlchemy · Docker · AWS</i>
---	--

Tuition Management System Created Flask-based backend system using Python and SQLAlchemy to manage student attendance tracking, marks recording, fee management, and timetable scheduling with role-based access control. Implemented business logic for automated calculations, data validation, and report generation with CSV export and PDF receipt generation capabilities. Containerized application with Docker for consistent development and deployment environments.	<i>Python · Flask · SQLAlchemy · SQLite · Docker</i>
--	--

EXPERIENCE

Cloud Technology Intern — AxisRay Completed hands-on assignments covering cloud computing fundamentals, application deployment workflows, and infrastructure automation concepts for scalable software systems. Explored cloud service models, containerization basics, and deployment strategies for Python applications on cloud platforms.	June 2025 · 15 Days
--	---------------------

MLOps Technology Intern — AxisRay Completed assignments on machine learning deployment including model containerization, Python API development for model serving, and CI/CD pipeline integration. Studied MLOps workflows covering data processing, model training, versioning, deployment automation, and monitoring strategies for production systems.	May 2026 · 15 Days
--	--------------------
